

BIGAVR6

Electrical schematic

Development System

This document provides a complete electrical schematic of the BIG development system. Such device has been designed carefully and attention has been paid to choosing components thereof. This is why the important parts of the system are manufactured in SMD (Surface Mount Device) technology. Besides, the components are mounted by machine, the last generation using lead-free alloy for soldering. What we have as a result is a high quality and reliable product that meets the world's highest standards being applied in electronics industry and environmental protection.
